

# ■ PepoSoft.ai Prompt Cheatsheet

## 📝 ■ Writing & Blogging Prompts

- Write a beginner-friendly blog post on how AI tools can save students time in writing essays. Use simple language, examples, and a clear structure.
- Generate a 1000-word article on the future of AI in creative writing with engaging subheadings, a friendly tone, and SEO optimization.
- Explain what makes AI-assisted writing different from AI-generated writing in a way that college students can easily understand.

## ■ Student & Academic Prompts

- Summarize the book Atomic Habits by James Clear in under 500 words with bullet points for students preparing for exams.
- Write a college-level essay on climate change with an introduction, thesis, body paragraphs, and conclusion.
- Create a study guide for 10th-grade geography, chapter 1, highlighting key terms and short definitions.

## ■ Business & Marketing Prompts

- Write a LinkedIn post about why small businesses should start using AI tools in 2025. Keep it professional yet engaging.
- Generate an email campaign for a new AI writing tool with a catchy subject line, body text, and a clear CTA.
- Create a product description for an AI-powered content generator in under 150 words, persuasive but easy to read.

## ■ Creative Writing Prompts

- Write a short science fiction story about a student who discovers an AI that writes essays too well.
- Create a poem in the style of Rumi about finding inspiration through AI.
- Write the first chapter of a mystery novel where the main character is a writer who uses AI to uncover secrets.

## ■ Chatbot & Conversational Prompts

- Act as a friendly AI tutor and explain machine learning in simple words to a 15-year-old student.
- Simulate a conversation between a teacher and a student about whether AI should be allowed in exams.
- Pretend you are an AI writing coach giving tips on how to avoid plagiarism when using AI tools.
